MATRIX OF REVISION NOTE.docx;

The following message is being delivered on behalf of JUITA.
_____

angga gede angga pradipta:

We have reached a decision regarding your submission to JUITA : Jurnal Informatika, "Voting Scheme Nearest Neighbor by Difference Distance Metrics Measurement".

Our decision is: Revisions Required.

Comments and suggestions from reviewers can be seen at the end of the email. To make checking easier the manuscript correction, we suggest that you write a revision note by filling in the matrix containing the corrections given by the reviewer and the part of the manuscript you have corrected (an attached file, "MATRIX OF REVISION NOTE"). Give a different color to the revised part of the manuscript. After the matrix is filled in, please concatenate at the last part of the revised manuscript.
Ensure the author has complied with the script writing rules by the template provided regarding the IMRAD model, presentation of tables, figures, and equations.
The author must ensure that the DOI is included in references originating from journal articles.
As per the author's guidelines, author must include the results of a plagiarism check with a maximum percentage of 20% after revision.
Please revise the manuscript and return it to JUITA no more than 20 days.

Best Regards,

Tatik Maftukhah
JUITA editor

Reviewer notes:

1. The KNN, LMKNN, and DWKNN methods are methods that are commonly used for classification. Explain the main contribution and novelty of your study related to the implementation or update of these three methods.

2. Explain comprehensively the meaning of the four images presented in Fig.
2. Give a title to each picture, and please provide an explanation.

3. Discuss Fig.2 in relation to the implementation of these four methods for voting.
